

*Photo 11. Vic Waugh standing on outcrops of shattered gneiss, south shore of the western lobe of K2 Lake (see Figure 7 for location). Similar outcrops occur at the margin of the K1 Diatreme along the west end of Kim Lake.*

*Photo 12. Close-up view of shattered gneiss, same location as Photo 11. Knife is 5 cm long. Small cobble of kimberlite (dark green colour) lies at lower left of knife.*
