Acous	1	Inds. 58 Agt. 44	17		3		Trapping and fishing for the canneries in the season, also for domestic food supply; off-shore sealing.	Generally prosperous and satisfactory, although their principal source of revenue ceased with the prohibition of pelagic sealing. At present these Indians sell (Amos Ellis' evidence) \$1,000 worth of furs annually. * * * The Checklesets have little contact with civilization or Christianity, but enjoy high repute for honesty, industry and other sterling virtues. The Tribe, although at present showing a numerical increase, is alleged to be doomed to extinction through intermarriage and in-breeding. The population decrease of the Band in 20 years past exceeds 100.	Industrial school at Alert Bay.	Do not want their children to attend a boarding school, as this involves the separation of the children from the parents, but would like to have a day school at Acous, and if such were established, with a good teacher, promise to loyally support it and see that all children attend during eight months in each year.	*Amos Ellis: It is at least over 50.
